Experience

Lyft | Ride & Bike Share Backend Software Developer

Montreal, Canada
Mar 2026 – Present

- > Developed and maintained a monolithic **Spring**-based web application powering a large-scale bike-sharing platform backed by **MySQL** and **Elasticsearch**.
- > Collaborated on the architecture and migration **strategy** for a major client transitioning from a legacy backend to a new service platform.
- > **Stepped in** to maintain the payment subsystem and its integrations with 6+ payment providers, ensuring uninterrupted development during a transition of key contributors.
- > Drove **initiatives** to improve code quality and reduce development feedback cycles through tooling, refactoring, and engineering best practices.

UKG | HRM & WFM Backend AI Software Developer

Montreal, Canada
Mar 2025 – Mar 2026

- > Contributed and developed a **RAG** backend application on FastAPI using **LangChain** with Google LLMs
- > Collaborated and developed an **Agent** backend orchestration based on **LLM** using **LangGraph** on FastAPI
- > Designed and lead a centralized conversation storage application across the tech team (**FastAPI**, MongoDB)
- > Mentored a group of interns and helped them learn engineering fundamentals in practice
- > Reviewed and improved several high level and low level technical designs

Secureauth | cybersecurity Backend AI Software Developer

Montreal, Canada
Apr 2022 – Mar 2025

- > Designed and lead an **Risk Engine App** leveraging Rule-based and **ML**-based analyzers (Python, FastAPI)
- > Refactored a backend machine learning application (**Training and Inference**) to save 40% development time by creating an **Object Oriented design**
- > Reduced inference time by 30% using OTEL traces and metrics
- > Composed and executed end-to-end **ETL** processes using **AWS services** and **Bento** to digest more than 100 records per second

Digikala | e-commerce Backend Software Engineer

Tehran, Iran
May 2021 – Dec 2021

- > Restructured the parcel packing module to support 70% more user **concurrency** (PHP)
- > **Diagnosed** and redesigned code workflows to reduce stock discrepancies by 50% (PHP)

Data Engineer / Analyst

Jul 2018 – May 2021

- > Created data backbone using MySQL and Clickhouse database to get real time data by 100% improvement (Pandas)
- > **Supervised** a team of 3 people to facilitate data-driven decision making by building reports (SQL)

Skills

Languages Python, Go, Java, PHP, Bash, C/C++

Frameworks FastAPI, Flask, Spring

Tools Docker, Kubernetes, AWS, GCP, Kafka, Unix Shell, Bento

Paradigms SOLID, TDD, Agile

Databases Postgresql, MongoDB, Redis, MySql, ElasticSearch

Soft Skills Collaboration, Leadership, Problem-Solving Mindset, Ownership, Adaptability

Education

Sharif University of Technology
Bsc. & Msc. in Aerospace Engineering

Tehran, Iran
2019
